

## END-TO-END FOOD TESTING THAT ENSURES QUALITY AND SAFETY

Your food production success depends on having a partner who understands your business, anticipates your needs, and acts as an extension of your quality team. While delivering safe, quality products and navigating evolving regulations are critical, you need more than just a testing provider – you need a collaborative partner invested in your success. At Element, we combine technical excellence with a partnership approach that puts your business goals first.

### WHY PARTNER WITH ELEMENT

We become an extension of your team through:

- **Dedicated Support Team:** A consistent team that knows your business, anticipates your needs, and provides accurate, First-Time-Right data from our ISO/IEC 17025:2017 accredited laboratories
- **Consultative Approach:** Regular check-ins and technical consultation to help optimize your testing program and address emerging challenges
- **Responsive Service:** Industry-leading turnaround times with 24/7 access to results through our customer portal, plus direct access to technical experts who provide guidance when you need it most
- **Flexible Solutions:** Customized testing programs that adapt to your changing needs and timelines
- **Quality Focus:** We understand your quality standards and business requirements to help ensure consistent, reliable results
